

ACJT1010-10F 10A TRIAC

Rev.A.1.0

DESCRIPTION:

The ACJT1010-10F triac is suitable for general purpose AC switching. It can be used as an ON/OFF function in applications such as heating regulation, induction motor starting circuits, for phase control operation in light dimmers, motor speed controllers. The ACJT1010-10F embeds a TVS structure to absorb the inductive turn-off energy such as those described in the IEC 61000-4-5 standards. By using an external plastic package, ACJT1010-10F provides a rated insulation voltage of 2000 VRMS. Package TO-220F is RoHS compliant.
